EV (Electro-Voice®) INTRODUCES NEW GLADIATOR SYSTEM PACKAGES, GLADIATOR XL and GLADIATOR SUPER STACK, AT WINTER NAMM

ANAHEIM, CA (January 15, 2004): Based on the successful launch of the Electro-Voice® Gladiator in 2003, EV (Electro-Voice®) is proud to introduce two Gladiator system packages at this year's Winter NAMM, Booth #6778.

The Gladiator Series features two models – the Gladiator 115, 15-inch two-way, and the Gladiator 118, 18-inch subwoofer – both designed to withstand and outperform the rigorous demands of live sound, DJ, and A/V applications.

Gladiator G115 2-Way

- High Output EVS-15FR 15-inch Woofer
- 60-degree x 40-degree Controlled Coverage
- DH2010 Compression Driver for Extended HF
- High Sensitivity, 99 dB
- 400W Cont., 1,600W Peak Power Rating

Gladiator G118 Sub

- EVS-18S 18-inch Woofer with High Power 4-Layer Voice Coil
- Extended Response to 32 Hz
- Built-in Crossover for use as 3-Way System
- 400W Cont., 1,600W Peak Power Rating
- Boosts LF Output to 134 dB

Used together, EV's unique system design allows one amplifier channel to drive the sub's built-in crossover that provides the full-range output. No additional crossovers or amps are required for this true 3-way system. Originally matched to the Electro-Voice Q66 amplifier – with up to 850W per channel – Electro-Voice has gone one and two steps further for 2004 adding their brand new CP2200 Class-H Compact Precision Series Power Amplifier to the Gladiator system idea, now providing even more SPL and power!

GLADIATOR XL

Package includes an EV (Electro-Voice) CP2200 Compact Precision Series Power Amplifier and one G118 and one G115 per side.

News Release

GLADIATOR SUPER STACK

Utilizing Electro-Voice Compact Precision Series amplifiers' capability for lower loads, combine two G118 subwoofers and one G115 full range per side for a system that provides 2 x 1100W of power output – at superior performance.
