

**“If I had to sum up the system in a few words: it’s pure enjoyment.”**

Henk Heesbeen, FitXpert

SOUND SYSTEM SOLUTIONS

## FITNESS CENTERS

### Atmospheric audio areas

#### Atmosphere

For lobbies, locker rooms and other non-workout areas, we offer acoustically and aesthetically matched options for high-quality paging and background music. Set the right audio ambience with seamless coverage throughout your facility.

#### Best performance everywhere

Achieve sonic clarity and control in all areas with installed loudspeaker systems designed specifically to provide best controlled even coverage. Our systems deliver superior performance for every part of your property, providing full-range music and clear, intelligible paging.

#### Low cost of ownership

More and more companies are required to reduce their carbon footprints and overall building energy costs to meet strict environmental regulations. Dynacord amplifiers have a proven track record when it comes to supporting energy savings without sacrificing any performance.

#### Highest reliability

Electro-Voice loudspeakers and Dynacord power amplifiers enjoy an excellent reputation for outstanding audio performance and extreme robustness. Bullet-proof protection circuitry with sophisticated limiters are protecting the amplifier as well as the connected loudspeakers from damage without limiting the sound performance.

# FITNESS CENTERS

EXAMPLE FOR BACKGROUND AUDIO

## System overview

EVID pendant and surface-mount loudspeakers provide full range coverage for cardio floors, weight training and common areas. EVID subwoofers can be added for additional low-end support.

## System benefits

The EVID loudspeaker family is designed to be mixed and matched depending on the installation environment.

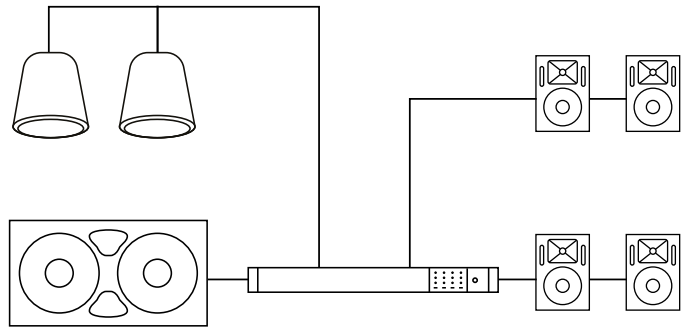

Unique Dynacord technologies like ecoRail and Variable Load Drive (VLD) for reduced cost of ownership, with low energy consumption, flexible power usage and protection against excessive power & overheating included in V series amplifiers.

PowerTANK technology is adding installation flexibility, working like a power reservoir for the amplifier. With direct access to the total amp power, the V600:4 can deliver asymmetric power across all channels as needed.

## DYNACORD | AMPLIFIERS

V600:4 (driving all loudspeakers)

## ELECTRO-VOICE | LOUDSPEAKERS

EVID-P6.2 (pendant loudspeakers for open ceilings)

EVID-S5.2 (loudspeakers for wall and surface mounting)

EVID-S10.1D (subwoofers for low-end support)

## If you need it, we've got it

Electro-Voice offers the industry's most complete portfolio of installation-dedicated loudspeaker solutions, with acoustically and aesthetically matched surface-mount, ceiling-mount, pendant-mount and flush-mount models for spaces of every size and shape, indoors or outdoors.

Models from each series may be mixed and matched for consistent performance across any application, providing system designers with complementary building blocks to address the needs of a wide range of venues and acoustical challenges.
