

ZxA1-100

8-Inch Two-Way

800 Watt Amplified

Loudspeaker System

Key Features:

- 800 W Class D Lightweight Amplifier
- Lightweight and Durable ABS Enclosure
- 2-way loudspeaker with EV8L 8" Woofer and DH2005 Titanium Compression Driver
- Rotatable High Frequency Waveguide with Two (2) Coverage Patterns
- Bi-Amplified Design with 24dB/Octave Filter Slopes and Transducer Protection
- Selectable 100Hz High Pass Filter for use with an External Subwoofer
- XLR/TRS Combo Line Input
- XLR Microphone Input with Gain Control
- XLR Summed Output
- LED Indicators for Power On and Limit
- Pole Mount
- 45° Monitor Angle

General Description:

Only to be expected from Electro-Voice, the ZxA1-100 packs a big-stage punch. Electro-Voice drivers, components, and amplifiers are legendary—all proven at the highest levels of live performance. ZxA1-100 wraps Electro-Voice technology in a durable, lightweight cabinet, resulting in the most powerful and versatile compact loudspeaker available today. Match ZxA1-100 with the ZxA1-Sub to create a truly exceptional professional sound system. The Electro-Voice ZxA1-100 powered loudspeakers are fully integrated audio systems with carefully matched electronics and transducers. These products make it easy to setup a high quality sound system quickly with a minimum amount of cables and external electronics. The Electro-Voice ZxA1-100 is a compact, amplified loudspeaker system, which is designed for portable sound reinforcement applications that require maximum portability. The ZxA1-100 utilizes the EV8L, a high output, low distortion, 203mm (8 inch) woofer. The woofer is paired with the DH2005, a titanium diaphragm true compression driver. The compression driver is coupled to a rotatable 90° x 50° waveguide for smooth response to 20kHz and excellent pattern control. The ZxA1-100 loudspeaker is powered by an integrated 800W, bi-amp module. The amplifier has a dedicated XLR micro input and a combo XLR/TRS line level input as well as an XLR line level output for daisy chaining several ZxA1-100 units together or adding a ZxA1-SUB. The bi-amplified design features steep crossover slopes and woofer excursion protection for maximum output and reliability. A switchable high-pass filter allows for use with the ZxA1-SUB. The ZxA1-100 injection molded enclosure is made from high impact ABS for durability and light weight. The handle pocket and pole mount make the ZxA1-100 ideal for many portable applications. The ZxA1-100 enclosure also features a built in 45° monitor angle for floor monitor applications. The bottom of the ZxA1-100 features four (4) #8-32 suspension points for permanent installation.

Technical Specifications:

Freq. Response (-3dB):	60Hz–20kHz ¹
Freq. Range (-10dB):	48Hz–20kHz ¹
Max. Measured SPL:	126dB ^{1, 3}
Coverage (Horiz. x Vert.):	100° x 100°
Power Rating:	800W
LF Transducer:	(1) EV-8L, 204mm (8") Woofer
HF Transducer:	DH-2005, 25mm (1") Exit Compression Driver
Crossover Frequency:	1.8kHz
Connectors:	(1) XLR Mic Input with Gain Control, (1) XLR/TRS Combo Jack, (1) XLR Link Output
Enclosure Material:	ABS
Grille:	18GA Steel with Black Powdercoat
Mains Requirements:	100V: 80V–110V, 0.7A ⁴ , 50–60Hz 120V: 95V–132V, 0.6A ⁴ , 50–60Hz 230V: 190V–264V, 0.4A ⁴ , 50–60Hz
Dimensions (H x W x D):	457mm x 282mm x 264mm (17.99" x 11.10" x 10.39")
Net Weight:	8.6kg (19.0lbs)
Shipping Weight:	10.3kg (22.7lbs)

1. Full-Space

2. Half-Space

3. Typical maximum SPL value at one (1) meter over the usable frequency range. measure with a pink-noise burst signal, using internal signal processing and amplifier driven to peak output.

4. 1/8 power
