EV® and MIDAS® INSTALLED AT EXCLUSIVE FLORIDA COMMUNITY CENTER

A cluster of EV® FRi™ boxes flown gracefully in the 'no expense-spared' clubhouse

West Palm Beach, FL (August 2004): High-end home audio and video installation specialists Sound Advice (part of the Tweeter Entertainment Group) recently undertook an extensive **EV**® installation at a new dream home community clubhouse near West Palm Beach Florida. Sound Advice is also under contract to install home entertainment systems into the luxury homes in the community, built by the industry leader in the field. John Jackson of Sound Advice described the project: "I was asked to specify a system for the large resident clubhouse – a 10.5 million dollar entertainment complex designed and built with the same attention to detail as the homes themselves. It features three pools, a gym, a ballroom, boardrooms, gaming rooms, etc. I've been working with (EV reps) Sales Force & Associates for years now, putting EV into most of the other installations that I work on, and this was no exception – EV make equipment for any sized application. I worked with Jeff Stover from Sales Force and EV distributors BEI. and we specified two clusters of two FRi-152/64™ full range boxes, with an FRi-**1815**™ sub in between each pair. EV's tech support recommended Polar Focus™ rigging for this application. Polar Focus™ sent a great rigging array that looks as good as it works - just like the rest of the gear."

Jackson continued: "We also installed four dual Telex® CDR-**1000**[™] wireless mic systems with four handhelds and four bodypacks – two for headsets, two for lapel mics. Processing is via multiple **EV Dx38**™ units. Another component that really adds finesse to this installation is the Midas® Venice™ 240 mixing console. We wanted to install a mixing console that would optimize the performance of the entire system. The Midas preamps and EQs are fantastic, and really make a difference in a PA that will be used primarily for vocals and playback. It's also the perfect accompaniment to the video projection system we installed, which includes a 200inch drop-down screen. The grand opening was on August 8th, and the system sounded fantastic - it was important to the client that we installed a premium quality PA at the site in order to be consistent with general luxury of the environment, and that's exactly what they have!"
