ELECTRO-VOICE® XLC HELPS MAKE HISTORY

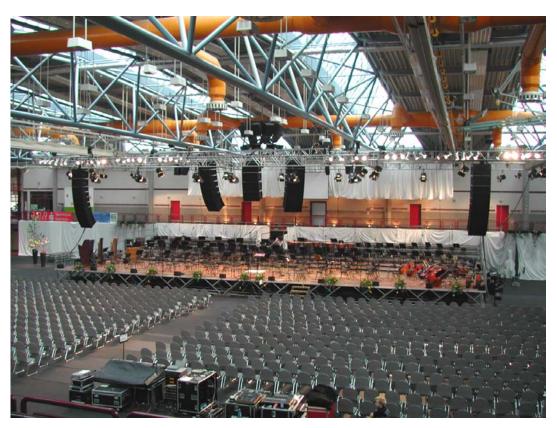

On the 5th March 2004, the largest concert of classical music in the history of the Rheinland-Pfalz was staged. FLO Service GmbH opted for an X^{LC} line array system.

Straubing, Germany (March 2004): The Stadionhalle Oberwerth in Koblenz was packed with an audience of over 4,000 people on the 5th March 2004 for a concert presented by the Staatsorchester Rheinische Philharmonie to commemorate the founding of the city's first orchestra 350 years ago. The musical highlight was a performance of Arnold Schoenberg's 'Gurre-Lieder'. Taking part with the Rheinische Philharmonie and the Philharmonisches Orchester of Heidelberg conducted by Shao-Chia Lü were over 600 performers from all over Germany, making the 'Jubiläumskonzert 350 Jahre Orchester in Koblenz' the largest concert of classical music in the history of the Rhineland-Palatinate.

To reproduce the rich variety of instrument textures and voices both subtly and powerfully, FLO Service GmbH, who were responsible for the sound reinforcement for the entire event, opted for a generously dimensioned Electro-Voice X^{LC} line array system on account of its compactness, the brilliance of its sound, its outstanding versatility and its easy and

unproblematic handling. The EV X^{LC} system realised the sound design of *Tonmeister* Holger Schwark and System Operator Stefan Holz perfectly.

Commented Tim Sandrock, the technical director of the Mainz-based sound company: "The decision to use an EV X^{LC} system was absolutely the right one. To create the effect of envelopment for those on the stage as well as in the auditorium, we decided to use four system units each comprising eight X^{LC} 127+ enclosures." Oliver Kornisch, FLO Service's system operator added: "We also flew a central cluster of Electro-Voice X^{LC} 118 cabinets. The large number of EV X^{LC} 127+ enclosures we were using made it possible to achieve ideal coverage of the hall with minimal interference." FLO Service acquired their first EV X^{LC} system last year. Already they have used it for a very wide variety of events, ranging, according to Tim Sandrock "from Rock 'n' Roll to industry jobs." As a result of the uniformly excellent experiences they have had using the system, FLO Service GmbH recently expanded considerably their stock of X^{LC} enclosures.

The following equipment was used at the 350th Jubilee concert in Koblenz (extract):
