### EV (ELECTRO-VOICE®) INTRODUCES NEW EVID™ CEILING SPEAKER LINE AT NSCA

**DENVER, CO (April 25, 2002):** EV (Electro-Voice ) introduces the EVID™ (Electro-Voice® Innovative Design) ceiling speaker line at this year's NSCA, Booth #2306, 2307, 2407, and demo room 101A/103A. The EVID ceiling speaker line is an addition to the existing EVID loudspeaker line – the latest in high-quality, innovative foreground/background premium surface-mount speaker systems. With EVID, sound contractors can turn any place of business – whether a restaurant, bistro, bar, department store, outlet or other commercial environment – into a positive sound experience.

The addition of the EVID ceiling speaker line expands EV's commitment to professional sound contractor needs in a wide variety of applications. There are EVID ceiling speaker models specifically designed to solve any installation challenge. EVID ceiling speaker systems fit any acoustic or aesthetic requirement. Additionally, EVID provides the contractor with subtle and unobtrusive installation options that can be quickly and simply performed.

The EVID™ ceiling speaker line features four models to meet the needs of today's commercial sound contractor.

EVID C4.2, 4-inch two way, perfect for conventional rooms. Excellent bandwidth in an aesthetic and unobtrusive installation profile.

EVID C8.2, 8-inch two way, incredible power handling and bass performance for a ceiling speaker system. Perfect for installations that demand high full-range audio performance in a flush-mount package.

EVID C8.2HC, 8-inch horn-loaded two way, ideal for high ceiling and reverberant "problem" rooms. Patent pending horn-loaded design. Provides for excellent intelligibility and definition. Great coverage control throughout the voice spectrum and above. No other ceiling speaker system provides the combination of excellent pattern control, wide bandwidth, high power handling and compact design like the C8.2L.

EVID C10.1, 10-inch driver, one of the only quick-mount ceiling-true subwoofers available on the market. Flexible installation and powerful low-end performance make this the ideal companion to any EVID model.
