

Sx250/SxA250

SK1 Rigging Kit Installation Instructions

SK1 Rigging Kit

The SK1 Rigging Kit features rigging track and hardware that allows you to suspend any Sx250 or SxA250. Its assembly is quick and easy with the hardware already provided on your Sx250 or SxA250.

SK1 Rigging Kit Includes

Item	Description	Qty.
1	Rigging Handle Assembly with 5" Track	1
2	Ankra Anchor Plate	1
3	Single Stud Ankra Track Fitting w/Safety Pin	2

SK1 Rigging Kit Assembly (SxA250 Shown)

Step 1: Remove original handle insert

Remove original handle insert by removing the four screws shown. Keep these screws to assemble the rigging handle insert.

Kit can be installed at
either handle location.
(SxA250 only)

Step 2: Attach Rigging Handle

Using the four screws removed in Step 1, attach rigging handle (Item 1) to speaker.

SK1 Rigging Kit Assembly

Step 3: Attach Anchor Point

Remove the screws shown from the back of the enclosure. Use these to attach the Ancra Anchor (Item 2) to the enclosure.

Step 4: Attach Track Fittings

Attach one Ancra Track Fitting (Item 3) to the Rigging Handle and one to the Anchor point.

MAKE SURE THE SAFETY PIN IS PROPERLY FASTENED TO EACH TRACK FITTING BEFORE SUSPENDING.

WARNING: Suspending any object is potentially dangerous and should only be attempted by individuals who have a thorough knowledge of the techniques and regulations of rigging objects overhead. Electro-Voice® strongly recommends that SxA speakers be suspended taking into account all current national, federal, state and local regulations. It is the responsibility of the installer to ensure that SxA speakers are safely installed in accordance with all such regulations. If SxA speakers are suspended, Electro-Voice® strongly recommends that the system be inspected at least once a year. If any sign of weakness or damage is detected, remedial action should be taken immediately. There are also data sheets for each EV hanging hardware part that should also be consulted prior to suspending speakers.
