

Model 376
Windscreen
for Microphones

General Description

The Electro-Voice® Model 376 Windscreen has been developed for use with the Electro-Voice ball type microphones. These include the following current products: RE50, N/D967, N/D767a, N/D367s, N/D267a, N/D267as, RE410, and RE510. The 376 Windscreen is also for use with the following legacy products: DS35, 1776A, 1777A, 671A, PL95, PL77A, PL76A, PL80, PL91A, RE11, RE16, and PL11. The 376 serves as a pop filter on the RE11, RE16, and PL11, which require covering of the slotted tubes for full windscreen protection.

The Model 376 Windscreen is fabricated of Acoustifoam™, a material specifically developed for this use. Unique open-cell Acoustifoam™ material adds additional protection against dust, magnetic particles, moisture, etc., while also performing its primary function of screening out wind noise and annoying p-pops.

There is minimal signal attenuation caused by using the Model 376, and it is only noticeable above 10 kHz. The directional characteristics of the microphones are unaffected.

Installation

The Model 376 is designed to fit snugly over the microphone. To install, stretch windscreen over the ball portion of the microphone and slip into position. The Acoustifoam™ material will shrink tightly into position in only a few seconds. A snug fit is all that needs to be checked.

Important Note:

The 376 should be washed periodically with a mild soap and warm water in order to maintain the porosity of the Acoustifoam™.

Specifications subject to change without notice.

Technical Specifications:

Material:	Acoustifoam™
Color:	Gray
Recommended For (Current Products):	RE50, N/D967, N/D767a, N/D367s, N/D267a, N/D267as, RE410, RE510
Recommended For (Legacy Products):	DS35, 1776A, 1777A, 671A, PL95, PL77A, PL76A, PL80, PL91A, RE11, RE16, PL11
Dimension, Length:	97 mm (3.80")
Dimension, Diameter:	70 mm (2.76")
Net Weight:	7 g (0.25 oz.)

Dimensions:

12000 Portland Avenue South, Burnsville, MN 55337
