

DESCRIPTION AND APPLICATIONS

The Electro-Voice model 307 suspension shock mount adapts to boom use any microphone having a cylindrical 3/4-inch diameter case. It may be attached directly to a microphone boom or floor stand. Where boom shadows tend to limit freedom of the microphone movement, a model 306 extension arm should be used.

The 307 shock mount permits quick installation or removal of a microphone without tools. A molded plastic support grips the microphone snugly and is supported by two molded neoprene shock cords to provide maximum isolation from shock.

The Electro-Voice 306 extension arm/307 shock mount assembly can be boom or stand mounted to provide shock isolation for the RE10, RE11, RE15, RE16, RE55, 635A, 649B, or other microphones having cylindrical 3/4-inch diameter barrels.

SPECIFICATIONS

Model 306 Extension Arm

Material:	Aluminum
Finish:	Non-reflecting gray
Dimensions:	See Figure 1
Weight:	3½ ounces (99g)
Accessories:	(for use with model 307)

Model 307 Suspension Shock Mount

Material:	Steel, Aluminum, Lexan
Finish:	Non-reflecting gray
Dimensions:	See Figure 2
Weight:	8 ounces (227g)
Accessories:	5/8"-27 stand adapter

REPLACEMENT PARTS

Should the rubber suspensory ligaments (shock cords) wear out through excessive use, deteriorate due to atmospheric conditions, or in any way change, new ones may be ordered from Electro-Voice, Inc., Buchanan, Michigan 49107. Write to the attention of Miscellaneous Parts Department and request Part No. 77341. You will be billed for the cost.
