Model 522 Extension Cable

SPECIFICATIONS

Cable Dimensions:

3 m (10 ft) long
2.3 mm (.09 in.) diameter

Connectors:

TA3M
TA3F

Conductors:

Two plus shield

Cable Color:

Dark gray

DESCRIPTION AND APPLICATIONS

The 522 extension cable is designed to be used with the Model CO94 microphone as an extension of the cable between the microphone capsule and the power supply-buffer assembly. The 522 employs the same tough cable used on the CO94 and CO90 microphones. This cable though less than .1 inch in diameter is remarkably strong due to its unique construction. The cable employs "stay cords" made of an extremely strong fiber originally developed for military cables. Stay cords give the cable the ability to resist great tensile loads without the size and stiffness normally required.
